📁 My Portfolio

Computer Science Undergraduate pursuing a BSc (Hons) in Computer Science. Seeking a Computer Science Internship to apply my skills in full stack development, problem-solving, and modern web technologies while contributing to real-world projects and gaining industry experience.

EDUCATION

BSc (Hons) in Computer Science (2024 - Present)
Saegis Campus.
Current GPA: 3.02 / 4.0

GCE A/L - 2021 (Commerce Stream)
GCE O/L – 2015

Achievements

AI for Beginners - HP LIFE
Issued Jul 2025
Credential ID 01447a87-0086-411e-aa5e-f1a5dd161025

PROJECTS

Task Manager | (Individual)

Technologies: **MongoDB, Express.js, React.js, Node.js (MERN Stack), JWT, Tailwind CSS**

[Backend](#) [Frontend](#)

Developed a high-performance task management system with a complete RESTful API backend and a dynamic React.js frontend. Implemented secure user authentication using JSON Web Tokens (JWT) and Bcrypt password hashing to ensure data privacy and protected routing. Designed a robust schema in MongoDB Atlas for efficient storage of user profiles and tasks. Developed a fully responsive dashboard using Tailwind CSS, providing a seamless user experience across mobile, tablet, and desktop platforms.:

Online Exam Apply & Management System | (Individual)

Technologies: **PHP, MySQL, HTML5, CSS3, JavaScript, PHPMailer, phpMyAdmin**

[GitHub Repository](#)

Architected and deployed a full-stack web application to digitize and automate the examination application workflow for educational institutions. Implemented a multi-tier authentication system supporting four distinct user roles: Students, Lecturers, Administrators (Directors), and Assistants. Developed a secure user authentication module featuring encrypted password storage and an automated password reset system utilizing PHPMailer for email verification. Engineered specialized dashboards for lecturers to review student eligibility and for administrators to monitor system-wide application approvals and user roles. Designed a relational database in MySQL to manage academic years, course modules, and batch records.

Smart Campus Native App Design | (Group)

Tools: **Figma, Canva, Adobe Photoshop**

[Prototype](#)

Conceptualized and designed a high-fidelity native mobile application focused on digitizing the student experience through a "Smart Campus" ecosystem. Integrated a dedicated interface for an AI Chatbot. Designed an interactive Campus Map and Building Navigation system to help students locate facilities and navigate complex campus layouts efficiently. Engineered specialized UI modules for a Smart Library system, Resource Finder, and a dynamic Schedule Page to manage lectures and assignments. Developed a cohesive Academic Support hub, ensuring high accessibility and an intuitive user experience for all campus-related services. Created a fully clickable prototype to demonstrate complex transitions and the seamless integration of AI features within a mobile environment.

Library Management System | (Individual)

Technologies: **Java (Swing), MySQL, JDBC, phpMyAdmin, NetBeans IDE**

[GitHub Repository](#)

Developed a desktop-based library management application using Java Swing for the graphical user interface and MySQL for persistent data storage. Implemented full CRUD operations allowing administrators to add, update, view, and delete library records for both Books and DVDs. Engineered a streamlined borrowing and return system with real-time database updates to track item availability. Utilized JDBC to establish secure connections between the Java application and the MySQL database, ensuring data integrity for user records and library inventory.

Riya Sewana Website Redesign | (Group)

Tools: **Figma, Canva, Adobe Photoshop**

[Prototype](#)

Redesigned the interface of a prominent Sri Lankan vehicle marketplace to improve user navigation, visual hierarchy, and responsiveness. Conducted usability analysis to identify pain points in the existing platform, focusing on streamlining the vehicle search and listing process. Developed a high-fidelity interactive prototype in Figma, incorporating modern design patterns to enhance user engagement and accessibility. Utilized Canva and Photoshop to create custom assets, ensuring a consistent and professional aesthetic across all web interfaces.

SKILLS

- Programming Languages - Java, C, Python, PHP
 - Web & Frameworks - HTML 5, CSS 3(Bootstrap, Tailwind), JavaScript, React.js, Node.js, Express .js
 - Database - MongoDB, MySql
 - Dev Tools - Git & GitHub, VS Code, Android Studio, Figma, Adobe Photoshop
 - DevOps & Hosting - Vercel, GitHub Pages
 - Methodologies: Agile / Scrum, REST API design
-

INTERESTS

Web Development
Software Development
Full Stack Developments
Mobile Application Development
UI Designing and Development

PROFESSIONAL EXPERIENCE

Operations Executive | Startek Nov 2022 – Oct 2023

Managed high-volume customer inquiries via phone, providing efficient resolutions and maintaining a high standard of service quality. Handled complex complaint escalations and technical inquiries, ensuring customer satisfaction through effective problem-solving. Collaborated with cross-functional departments to support backend operational tasks and streamline call center workflows.
